SUSTAINABILITY, QUALITY AND PURPOSE

We live in a manufactured world as we deepen the divide between ourselves and the great outdoors. From pine-scented candles to peppermint toothpaste, our homes are filled with products that contain only trace remnants of the natural world. Instead of turning to man-made synthetics to solve our problems, we're turning back to nature to live healthier, cleaner lives.

As the leader in the modern essential oils movement, Young Living has paved the way towards greener living by blending nature and innovative and proprietary technology to draw us closer to the world around us. For over 25 years, we've defined what it means to deliver the most pristine oils on the market. That quality relies on our Seed to Seal® quality commitment, ensuring that every product reflects our rigorous, thoroughly tested, top-to-bottom quality approaches.

With a 99 percent landfill-free status, a trophy shelf of clean building awards, and more than 2,500 harmful mainstream chemicals banned from our product formulations, we help you reduce your harsh chemical footprint while simultaneously eliminating our own. Our planet takes care of us, and we return the favour with recycling, waste-cutting, regenerative agriculture, and more to deliver products to your home using the most responsible and sustainable methods.

The synthetic world we live in might be what we're used to, but we aren't confined to the material world. Ancestral knowledge about the workings of nature is all around us. By connecting and learning from the natural world, we live in harmony with the planet and have the potential to elevate and transform our lives.

SEED TO SEAL®

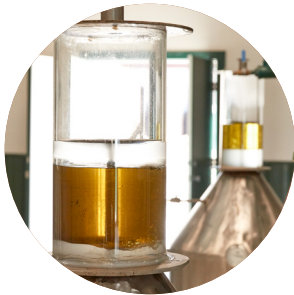

OUR QUALITY COMMITMENT

We created Seed to Seal® as a set of rigorous quality benchmarks that put people and planet first. Seed to Seal's three pillars—Sourcing, Science and Standards—let you fall in love with Young Living products knowing that inside each bottle, tube, box or bag is a powerful product with a sustainable story.

SOURCING

Quality products come from quality sources. That's why we work exclusively with Young Living corporate-owned farms, partner farms, and Seed to Seal-certified suppliers around the globe, so we can source conscientiously and prioritise quality as well as community and ecological impact. Our sourcing philosophy means that you never have to choose between quality and conscience.

SCIENCE

Purity starts in the field, but it's proven in the lab—two in-house labs and more than a dozen leading independent labs, to be exact. Every batch of Young Living essential oil undergoes advanced purity and efficacy testing and retesting by the 50+ highly trained scientists at our D. Gary Young Research Institute. Products that aren't powerful enough—or that simply aren't perfect—never make it to your home.

STANDARDS

Our decades of leadership mean that we're responsible for setting—and surpassing—the definitive green standard for others to follow. This requires a rigorous commitment to environmental standards that put people and the planet over profits. We proactively design, evaluate, and regulate our process to ensure we do things the right way.

Seed to Seal informs and inspires everything we do. For more detailed information on our Seed to Seal pillars, please visit SeedtoSeal.com.

What are ESSENTIAL OILS?

Lovingly harvested from farm-grown and wildcrafted plants, herbs, and trees, essential oils are concentrated plant extracts obtained by careful steam distillation, cold pressing, or resin tapping. These pure essential oils are far more powerful than the botanicals from which they are extracted. We offer hundreds of single oils, blends and oil-infused products, each containing the optimal levels of specific, naturally occurring constituents to maximise their potency. Whether you use oils for aromatherapy, personal care or household solutions, every aspect of daily life can benefit from the incorporation of essential oils.

HOW TO USE ESSENTIAL OILS

Topically

Many essential oils are safe and beneficial to use directly on the skin.

- Place 2–3 drops of essential oil directly on the desired area and massage in. Repeat as desired. Always follow the label's dilution instructions.
- Rub 2–3 drops of essential oil between your palms and inhale.

Caution: Essential oils are very potent and may be irritating to the skin. If irritation occurs, apply Young Living V-6® Vegetable Oil Complex or any pure vegetable oil to the area to dilute. Citrus-based oils and blends may cause temporary photosensitivity.

Internally

When taking our Plus essential oil food supplements internally, try these tips:

- Place several drops of your chosen Plus oil/s into a gelatin capsule and swallow with water.
- Add 1–2 drops of your chosen Plus oil/s to a glass of water, NingXia Red®, juice, yoghurt, your favourite sweetener of choice or plant-based milk and swallow.
- Add 1–2 drops of your chosen Plus oil/s (to taste) to meals when cooking.

Note: Always consult individual product labels for usage directions.

THE FARMS

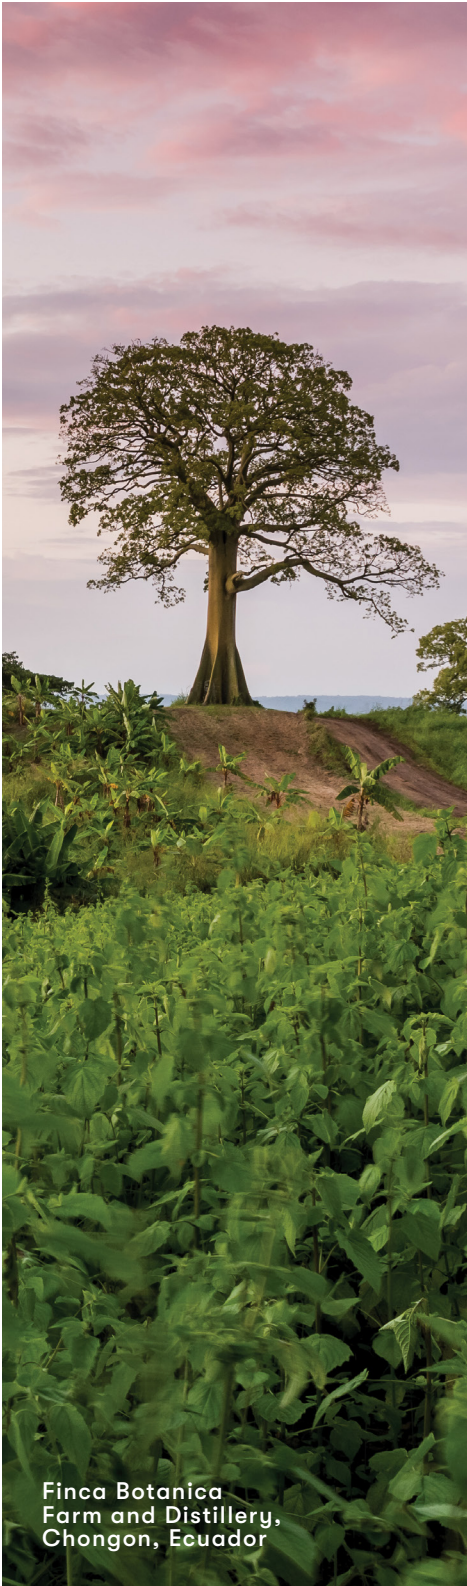

While our modern world is a miracle of engineering, it hasn't been such a miracle for our planet. Today's farming practices produce contaminated, modified crops and products that would be unrecognisable to our ancestors. To provide the most potent and nutritionally dense products on the market, we're going back to our farming roots, valuing quality over quantity.

When our founder, D. Gary Young, started the modern essential oils movement, he knew we couldn't harvest from farms that produced low-quality crops. Instead, he built his own farms. Unlike many commercial farms, Young Living's farms have never been sprayed with glyphosate or any other harsh chemicals. This ensures the source of our botanicals is as pristine as possible.

At our many corporate-owned farms around the world, you can find a fusion of ancient and modern farming practices that ensures that the natural essence of each plant is honoured and preserved from start to finish.

This is the foundation of our Seed to Seal® quality commitment, which backs every essential oil and ingredient-based product we deliver to your home. From the trusted sources of our essential oils and selected product ingredients to innovative, science-backed proprietary formulas and rigorous quality tests, we set and exceed the highest quality standards. Seed to Seal is governed by the activities defined within our three guiding pillars: Sourcing, Science and Standards.

This rigorous quality commitment ensures that the products in your home are as clean as nature intended, helping you connect back to the planet while doing your part to keep it green. Now with more than 24 farms across six continents, Young Living has set the standard for sustainable farming practices around the globe.
